Subject: Feedback on the 18fpool1 site

Madhu,

Here's my feedback for the 18f pool1 prototype site:

Navigability and Usability

- Easy to navigate through the different pages. The detailed information displayed in tables when the chart is clicked shows well. The column headers respond to sorting which makes it easier to sort and retrieve information faster.

- When the "Data field" of Classification is clicked on the page, the x-axis on the chart shows class I, class ii, class iii. What does this mean? Is class i better than class iii or is it the other way round?

Content and Usefulness

- The information conveyed seems useful for anyone wanting to quickly retrieve information on drug, devices or food recalls.

Design Responsiveness and Accuracy

- The site is easy to use and responds well both on my iPhone as well as on the Chrome and browsers on my computer.

- The site seemed a little wider that my phones screen on some pages.

Thanks,
Arun Bhat,
